

ColoCrossing's global footprint includes the prominent Market Post Tower facility in downtown San Jose California. Our SJC1 datacenter provides us with the flexibility to facilitate high-density private cabinets and cages of any size, thanks to the nearly 309,000 square feet of datacenter and office space available. ColoCrossing's diverse fiber rings provide redundant connections to our backbone network, ensuring total reliability and uptime.

General Information

Facility Provider	CoreSite
Address	55 S. Market Street, San Jose, CA 95113
Location Orientation	4 miles from San Jose International Airport
Commissioned	1996
Building Area	309,000 (sq ft) gross
Parking	75+ spots onsite

Computer Room Specifications (Per Room)

Raised Floor Space	2,000 sqft to 15,000 sqft per suite
Colocation Space	275,000 square feet
Electrical Capacity	(6) 4,000 ampere services at 460 volts
Power Density	Up to 8kW/cabinet supported
Floor Load Capacity	200lb psf
Building Type	15 floors
Raised Floor Height	36 inches
Fire Suppression	Laser-based Very Early Smoke Detection Pre-action zoned dry-pipe system
Redundancy	Minimum N+1 on all systems

Facility Information

Certifications	SAS 70 Type I certified
Primary Voltage	34.5kV
# of Utility Feeders	4
# of Power Transformers	8
Standby Power	Diesel generator systems onsite
Fuel Capacity	5,000 gallons of diesel
Cooling System	N+1 cooling systems onsite
Data Pathways	2 diverse fiber vaults for redundant entry
Roof Access	Available
Loading Dock	2 enclosed and heated bays, hydraulic levelers

Security

Building and Perimeter	Bullet-resistant protection at security check-in level III walls and doors
Security Staff	24/7/365 staffing with at least 2 officers
Access Control	Dual-factor authentication system (keycard + biometrics)
Alarm System	Yes
